### **Welcome Comment**

Good Morning Year 4!

I hope you are all well and staying safe. I've added a little 'thought for the day' on my planning for you – I think it's very relevant and very true!

Today's active task: Again, have a [dance](#) to one of my favourites! I'll be doing it too!

### **English Task**

Continuing with the work we started yesterday on similes and metaphors, I'd like you to explore this more today. Head over to the [BBC website](#). You can re-watch the video from yesterday and then watch a different one. Complete the activities under the videos. Use your yellow books to record your answers.

### **Thought for the day...**

"You're braver than you believe, and stronger than you seem, and smarter than you think."  
– Christopher Robin

### **Maths Task**

To warm up, have a go at the warm up task challenge. You can choose which level to start at.

Building on the work done yesterday, head over to [White Rose Maths](#) and go to 'Week 1: lesson 4 – Tenths on a number line'. Watch the video and have a go at the activities. Again, you can complete these questions in your purple books or on your squared paper.

### **Foundation Subject Task**

I'm setting you a DT challenge today Year 4. I would like you to design, make and evaluate your own Viking longboat. You can do this using recyclable materials from around your home (make sure you check with a grown up first before using anything!) Watch this [video](#) to find out why Viking longboats were so important and how they were used.

There are some ideas [here](#) and [here](#) for you on how you might like to make your longboat. Remember, you will need to design it first, writing a list of the materials you will need, what steps you will take and how you will put it together. When you have finished, evaluate your model. What went well? What could be improved? If you were to make it again, would you change anything? Why? Were there any parts that were trickier than others? Did you have any challenges to overcome? How did you manage them? Once you have made your model, you might like to create a computerised version, perhaps on Minecraft. You could even do a lego model. Take photos and send them to me!

### **Any Further Guidance**

I know some of you are finding this situation difficult the longer it is going on, but we need to make the best of it and keep being amazing like I know you can be. Remember, if you need to chill and switch your mind off for a bit, have a go at some cosmic kids yoga on YouTube or put on your favourite song and have a good dance! Keep going Year 4 – we've got this! 😊
