Welcome Comment

Morning Year 3. Wow your marble runs were fantastic and all so different. Hope you enjoyed yesterday's challenges and are ready to tackle today's 😊

Keep exercising!

English Task

Today I would like you to complete a book review for 'Gladiator Clash' you could use this template [template](#) or you could really challenge yourself and design your own. Good luck. I look forward to reading your reviews and seeing what your opinions on the book are.

Maths Task

Start by doing Times tables Rockstars. Your scores are really improving so keep going!

**Foundation Subject Task**

Today, we are going to do a bit of computing but without a computer! You will need these video links: [1](#), [2](#), [3](#) 1) Watch together a sequence of hand movements (See videos for ideas.) The sequence needs to be relatively complex or long so that your child will find it difficult to remember the parts without it being broken down into smaller parts. 2) Ask your child to recreate the sequence without showing it to them again or explaining the parts. 3) Ask if they could teach it to you in a more effective way, leading to the idea of breaking the sequence down into parts 4) Explain that breaking something down into parts is called decomposition. 5) Give your child paper or the [Sequence design sheet](#) on which to record their sequence. Give them time to work out their sequence of movements and record their decomposition. You could help them by discussing moves, recording each part, testing it out and debugging (fixing) it. Ensure they are breaking down their sequence into parts. Stop them occasionally to demonstrate their sequence so far. You could take photos of each part, or even video it! Good luck – I can't wait to see how you get on.

Any further guidance

Remember to keep emailing and have a great weekend 😊
