

Mrs Fassnidge's Family Thrive Challenge

Spending time outside, surrounded by nature, gives children the opportunity to immerse themselves in a dynamic environment which appeals to their senses. These sensory experiences can foster children's intellectual, emotional, social and physical wellbeing. Today's challenge combines the outdoors with Art.

Your task is to go on a nature colour hunt. The world around us is awash with colour. Nature uses colour to make sunsets more breathtaking, flowers more exquisite and wildlife more captivating. Your nature colour hunt can be completed anywhere safe that is outdoors – in the garden, in a park, along a nature trail. Take time to notice the colours around you. Look closely at the different shades of colour – you could try to learn some new colour names. Collect leaves, petals etc to use in your nature colour display.

Email a photograph of your nature colour creations to your class email address. We will select some to post on the school website.

Here are a few suggestions of how you might display your findings:

- ✚ Lie your natural objects on different coloured card.
- ✚ Construct a wall hanging.
- ✚ Create a nature jar of colour.
- ✚ Make a nature colour wheel.
- ✚ Draw a rainbow and fill it with your natural colours.
- ✚ Fill an empty egg box with nature's colours.
- ✚ Make natural paints from the items you collected.
- ✚ Design and make some natural sculptures.

Be creative and make your work stand out!
