

Curriculum Map
Sutton Park Primary RSA Academy
Year 3 Spring Term 2022

Does what you eat make you happy?

Rationale: This topic has been chosen to build on the children's understanding of the importance of living healthy and active lives. There will be opportunities for them to create their own healthy snacks and use this to gain a deeper understanding of nutrition. The text chosen will inspire children to read with intonation as well as inspiring them to use a range of writing techniques to make their writing more exciting.

KASE

Our curriculum is designed to ensure the children build their **k**nowledge whilst having opportunities to develop important **a**tttributes like teamwork and empathy. We plan for a clear progression of **s**kills and provide a wealth of **e**xperiences to further their engagement and understanding. We therefore call this our **KASE** curriculum.

English

In English we will be reading 'George's Marvellous Medicine' by Roald Dahl and will look closely at how to make our writing more exciting by using similes, alliteration, onomatopoeia and a range of punctuation. We will use this knowledge to write a new chapter in the story. Year Three will also design an advert for a healthy snack linked to their topic work, using language of persuasion. The children will continue to learn and have opportunities to practise their Year 3 spelling words. In reading the children will have the chance to talk to their peers about what they are reading and will record this in their home school diary.

Science

To become scientists, we will be looking at food and nutrition. Year Three will learn why animals, including humans, need the right nutrition to grow healthy by examining food groups and nutrient groups. Moving forward Year Three will find out about the human and animal skeleton. They will be investigating skeleton types and use words like exoskeleton and endoskeleton. They will sort animals based on their skeletons. In addition to this the class will learn about the muscles and will name the common bones in the body.

PE

This term Year Three will continue with their swimming lessons every Thursday afternoon. They will also learn basic skills like passing, receiving, and sending a ball through hockey. They will need their tracksuit bottoms and a jumper as these sessions will be outside.

DT

In these sessions the class will prepare a range of dishes. They learn to use correct techniques for chopping and mixing. Through this they will be learning about the nutritional values of each dish.

Maths

In Mathematics pupils will calculate mathematical statements for multiplication and division using known multiplication tables, including 2-digit x 1-digit, using mental and progressing to formal written methods. Year 3 will make 3D shapes using modelling materials and describe them. In our Mental maths sessions, we will continue to revise our knowledge of the X3 and X4 times tables but will have a focus on X8 and learn the relevant division facts and add and subtract 3-digit number & ones, tens, and hundreds.

Geography

To become geographers, we will use map skills to find where our food comes from.

PSHE and Thrive.

In these sessions, Year Three will discuss bullying, what this looks like and how to deal with it. They will also continue to negotiate rules and how to deal with disappointment in a positive way.

ICT

In Year Three the class will be learning how digital devices function and identify input and output devices.

RE

Key Question: How do festivals and worship show what matters to a Muslim. Through this the children will identify some beliefs about God in Islam and explore ways in which Muslims worship.

Music

Year 3 will listen to a range of traditional folk music from across the world. They will learn a new song and recognise the difference between pulse and rhythm.
